

A Parent's Guide to Digital homework.

This year we have introduced digital homework to ensure that children develop appropriate on line communication and collaboration skills.

My School

Every school child in Northern has a My School account. This account is accessed with a user name that follows them to the end of secondary school. e.g. **abrown132**. This user name is created from the first letter of the forename and their surname. Each user is assigned 3 additional random digits. In addition, the children use a password. A new password is usually requested 2 to 3 times a year.

The username for each child forms the basis of their email account

e.g.

username: abrown132

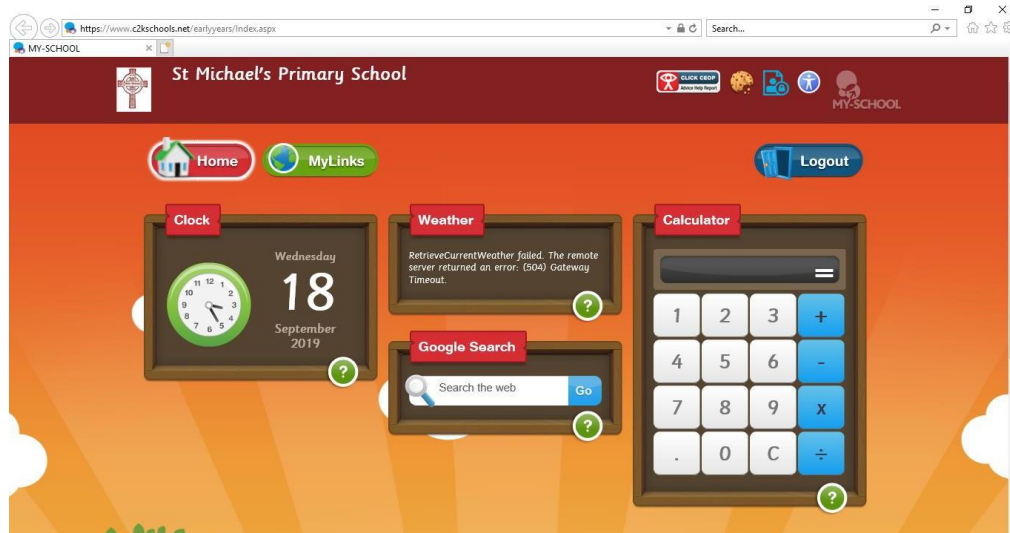

email:abrown132@c2ken.net

Access from home

A child can access their My School account from home on any digital device.

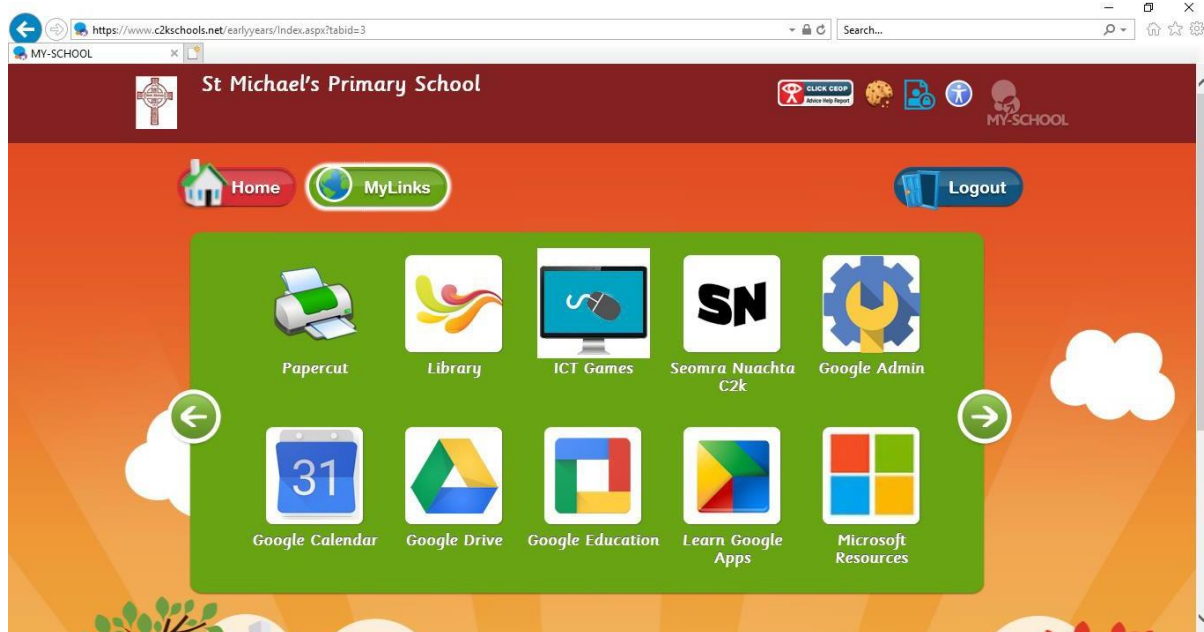

- Type 'my school' in to a search engine.
- Select MySchool Login (C2K) and the C2K site will ask for their user name and password.

They will then have access to their homepage.

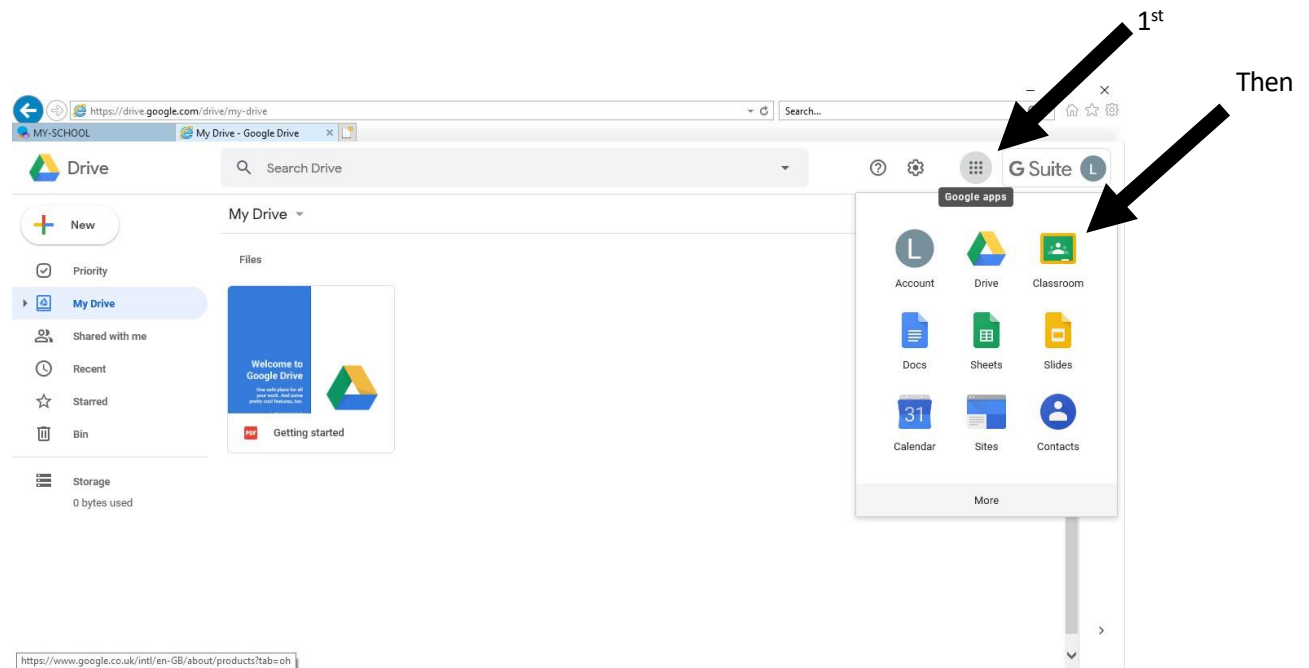

Google Classroom

Primary 4, 5, 6 and 7 children will also be given work through Google classroom. This is also available through 'My Links' on their home page.

Select Google drive

In Google drive click of the waffle in the top right hand corner and select Google classroom.

Comments made by children in the classroom can be seen by other children in the class much like a newsfeed. It is therefore important that children respond in an appropriate matter.

If you are using a chrome book or similar children can download the Google classroom app and access it using their email.
